HARMFUL IF SWALLOWED

APPLICATION INFORMATION

Lawns: Use a push-type or handheld spreader to scatter the granules uniformly. Apply 3- 5 pounds per 1,000 sq. ft. of lawn. Then turn on the sprinklers and water it in.

Flower beds & Vegetable gardens: Before planting, scatter 1-2 pounds per 100 sq. ft. Then work the fertilizer in by tilling the soil.

Shrubs & Trees: Ammonium Sulfate is perfect for acid-loving plants like azaleas, conifers, and rhododendrons. Scatter a handful over the root zone and water it in. (The root zone is the circular area from the trunk out to the ends of the branches.)

Compost Piles: Ammonium Sulfate adds nitrogen to compost and speeds decomposition. Scatter 1-2 pounds per 10 sq. ft. of packed organic material. Apply more fertilizer after each 6-inch deep layer is added to the pile.

Precautionary Statements

Wash face and hands and any exposed skin thoroughly after handling.

If Swallowed: immediately call POISON CENTER or doctor/physician. Rinse mouth.

CAUTION: KEEP OUT OF REACH OF CHILDREN
