

Guaranteed Analysis

Total Nitrogen.....	1.00%
1.00% Water insolble Nitrogen	
Soluble Potash (K2O).....	1.00

Derived from: tea seed meal
 * Slowly available Nitrogen from tea seed meal

Non Plant Food Indgredients
 Tea Seed Saponin..... Minimum of 15.00%
 Carbon..... Minimum of 45.00%

*Saponins may improve the biodegradation efficiencies of organic pollutants in microbial remediation.

**Carbon increases soil microbial activity for improvement of nutrient management.

Warranty Disclaimer and Limitation of Liability:
 Seller guarantees that the product meets its chemical specifications and is suitable for the intended purpose as indicated on the label when used according to the provided instructions under typical usage conditions. Due to the variability of weather, crop, soil, and other factors, Planet Turf, Inc. and/or the seller disclaim any warranties, whether expressed or implied, regarding the product's use. The user accepts all risks associated with the handling and use of the product, regardless of adherence to the provided directions or recommendations. Seller makes no other express or implied warranty of merchantability or fitness for a particular purpose. To the extent coherent with applicable law, it is the Seller's intent to limit any liability for exceptional, resultant or related economic damages to the refund of purchase price or replacement of product, as Buyer prefers. To the extent consistent with applicable law, Seller disclaims all liability for other damages related to use contrary to label directions, which said action is not permitted.

HARMFUL IF SWALLOWED

Product Information

Castaway is a homogenous fertilizer granule of tea seed meal made from the organic residue from the tea seed oil process. It can be used as a fertilizer turfgrass, ornamental plants, and landscapes.

Directions for Use

Apply to landscape areas at 6-12 lbs. of product per 1000 sq. ft. Apply enough water to dissolve the granule and wet the subsoil to a depth of 5 inches, approximately 0.2- 0.5 inches of water immediately, or within 24 hours of application. This will maximize product effectiveness and reduce pickup by mowers. Reapplication can vary, and if desired, one time per month. Heavier soils, such as clay, may require split irrigation cycles over a 48 hr. period. . Can be used on cool or warm season turfgrass or landscape plants. Apply to actively growing plants. Do not apply near water, storm drains or drainage ditches.

Do not apply if heavy rain is expected were product can be washed away from target area and into waterways.
 Remove and collect product applied to hard surfaces. from hard surfaces.

Precautionary Statements

Wash face and hands and any exposed skin thoroughly after handling.
If Swallowed: immediately call POISON CENTER or doctor/physician. Rinse mouth
 •Avoid breathing dusts
 •Use only outdoors or in well ventilated area
 •Wash thoroughly after handling
 •Do not smoke, drink, or eat when using this product.

CAUTION: KEEP OUT OF REACH OF CHILDREN
